A SERIES OF 11 HISTORICAL ENCYCLOPEDIAS | AGE 7–12 |

These encyclopedias tell the reader how children and adults used to live hundreds or even thousands of years ago. Here you will find not only the traditional tales of wars and generals, royal dynasties and power struggles, rise and fall of empires but also the everyday life in its details.

What furniture was there in an ancient Egyptian's home? How did Cretans build their ships? What toys did little boys and girls in Rome play with? What was there for dinner in Ancient China? How did people of the past live and work, what laws protected them, how did they study and shop, what medicine did they take and what did they do for fun – everything is described in our encyclopedias.

WE LIVE IN MEDIEVAL EUROPE

By Andrey Dubrovsky
Drawings by Alisa Yufa

The Middle Ages – the most controversial millennium in the history of mankind! This is the world of valiant knights and fair ladies, mighty kings and their loyal vassals, wandering poets and mendicant monks, grandiose castles and Gothic cathedrals. And at the same time, this is a gloomy and dark period, when epidemics and famine raged and ignorance and cruelty reigned everywhere. Let's go visit a monastery and a castle, a noisy city square and a university. We'll sit at the dinner table with lords and peasants, see how artisans work and where the merchants rush, join the ranks of pilgrims and crusaders. We'll see how the map of Europe changed, how states arose and collapsed, how dynasties came and went. We will find out what the medieval man himself was like: what he was afraid of and what he believed in. On this journey, you see the Middle Ages in all their glory!

Cities also have wildlife, and there is more of it than we think. How do wild animals and plants get along with humans in a modern city? In this book we visit various cities of Russia, meet the Baltic seal, tiger, mandarin duck, gray whale, karakurt spider and Lusitanian slug... We learn how urban ecosystems function, how green spaces help purify the air and make climate more comfortable, swamps purify water, and urban meadows save pollinating insects.

Is it true that the first football players in Russia entertained the public between bicycle races? Why did bachelors and married men have to play against each other? Is it possible to cheat, to deceive the referee and win the world championship? What teams did the Little Mozart, Black Spider and Black Panther play for? Most people never ask such questions, while the authors of this book have not only asked them, but also found the answers. This is an exciting history of football from the very beginning till present day, for both children and adults, either long-standing fans or those trying to understand what inspires their friends and family.

NOMADS

By Aigul Nigmatova

We are used to thinking that nomads are people who constantly move from place to place, following herds of animals, and live in complete unity with nature. This is true, but only partly. Nomads are herdsman of the steppes, the far north and deserts, and hunters and gatherers of Africa and Australia, and also wandering craftsmen: gypsies, vanlifers and just people working online and traveling around the world. But no matter what a nomad is, he never stands still and always looks forward. Freedom and nomad are almost synonymous.
